

# UpsideContract

## Version 6.1 (V6.1) Highlights

### Overview

Simplify the contract management process further with UpsideContract Version 6.1. This version can be summed up in three words—"ease of use". From UpsideContract's newest integration with WorkShare, the premier content comparison solution, to numerous enhancements in email and attachment management, V6.1 is all about making your workday easier. Start the contract lifecycle properly with V6.1 and benefit from the beauty of V6's clean and user-friendly interface.

### Streamlined Email Collaboration

Send and receive emails directly from the application. During the negotiation process, users now have the ability to include a copy of the contract and one or more attachments. Attachments may be on the contract record or selected from the user's desktop or network. As well, send contract-related correspondence to the system via email and it will automatically get attached to the contract record. This allows for the tracking of emails between parties during day-to-day communications for improved record keeping.

### Version Control of Attached Documents

There are many instances when the ability to create and store multiple versions of a document would be beneficial. By providing the capacity to version control attachments, users will enjoy a document management function to add to the UpsideContract toolkit. This provides an alternate method to manage vital documents during negotiations.

### Enhanced Importing and Formatting Capabilities

V6.1 allows users to automatically import a redlined document directly from an email. Significant improvements have been made to the import area for "non-template" type documents from suppliers and customers. In addition, the ability to retain the original formatting of a third party document provides a more accurate loading of the document. Support for printing documents with a multi-column format has also been added to enhance the usability of contracts across various layouts. With these improvements, you can import virtually any document and get the full power of managing the language, just like it originated from your own template!

### Version 6.1 Highlights

- Significantly improved third party paper capabilities.
- Better retention of document formatting when imported.
- Send and receive emails directly from the application as well as forward emails to the application.
- Comprehensive email and attachment management.
- Manage attachments in editable folders.
- Maintain multiple versions of attached documents.
- Integration with WorkShare, the leading content comparison application.
- Enhanced redlining capabilities when adding, deleting and changing text, including tables.

## Improved Redlining and Integration with WorkShare

UpsideContract is now integrated with WorkShare (DeltaView)—one of the premier redlining tools in the world. This provides exceptional tracking of additions, deletions, and the movement of text in a document. WorkShare has significant industry adoption in most legal departments. Users with WorkShare on their desktop can work on documents generated in the system; once editing has been completed, the document can be imported back into the system or sent off to another party. Support is also provided for true accept/reject functionality at the clause level and beyond. This innovation offers the best of Microsoft Word®, WorkShare and UpsideContract, a combination that will make any lawyer very happy!

## Attachment Folders

Easily organize and retrieve attachments using the editable folder structure. Users can attach documents into corporate folders on the contract while one or more folders can be added or “nested” onto a contract record. There’s no limit to the folder hierarchy a user can create, allowing for the ultimate in contract organization. This enhancement is handy when dealing with contracts that have many amendments and helps users to keep a more comprehensive audit trail.

## Conclusion

With its user-friendly interface and enhanced features, UpsideContract V6.1 propels the Upside Software solution suite into a new class. Upside Software is proud to count numerous industry-leading companies as part of its extensive customer base (almost 300); they have greatly influenced the innovations in this release and Upside’s roadmap. With its dedication to ongoing Research & Development and spending well over the industry average, Upside Software is poised for long-term success in the contract lifecycle management industry.
